Portfolio: https://fpc-portfolio.vercel.app/

Havana, Cuba

Professional Profile

Software Engineer with experience in full stack development, microservices architecture, and performance optimization. Specialized in React, Node.js, Python, AWS, Docker, and Kubernetes. Strong background in best practices, testing, and agile methodologies. Proven ability to lead and mentor teams, reduce development times, and improve system availability.

Work Experience

January 2023 – Present

GET – Full Stack Developer | Havana, Cuba

- Reduced initial render times by 40% through implementation of lazy loading using React.lazy and optimized PostgreSQL query restructuring via B-tree and Hash indexing and schema adjustments.

- Mentored 2 junior developers within a team of 5, increasing sprint velocity by 15% through enforced coding best practices and Unit Testing standards.

- Designed and deployed scalable microservices architecture utilizing Docker, Kubernetes, and CI/CD pipelines on AWS (EC2, S3) to improve system availability and reduce time-to-market for new features.

June 2022 – December 2022

CITMATEL – Frontend Developer & QA Tester | Havana, Cuba

- Frontend: Implemented complex, responsive UI components using React JS, JavaScript (ES6), and TailwindCSS, reducing development time by 15% through component reusability.

- QA: Executed over 50+ functional, regression, and exploratory tests using Jest and Cypress, including performance and load testing to ensure high software quality.

- Backend Integration: Streamlined workflows by consuming complex Django and PostgreSQL APIs, ensuring 100% data consistency across the application.

January 2021 – May 2021

Freelance – Junior Web Developer | Remote

- Built and delivered 10+ custom websites using React and Node.js for diverse international and local commercial sectors.
- Integrated e-commerce platforms with secure third-party payment gateways (Stripe/PayPal) and designed scalable RESTful APIs using Node.js and Express.

Technical Skills

Languages: JavaScript, TypeScript, SQL, Python.

Frameworks: NextJS, ReactJS, Redux, Context API, Zustand, Django, NodeJS, Express.

Databases: MySQL, PostgreSQL, SQLite, MongoDB, NoSQL.

Technologies / Tools: AWS (EC2, S3), CloudWatch, Docker, Kubernetes, Git/GitHub, Terraform, Jest, Cypress, Playwright.

Practices: Agile, Scrum, SOLID Principles, Design Patterns, Microservices, Code Reviews, CI/CD, OpenAPI, RESTful APIs, ORM, Unit Testing, E2E Testing.

Projects

- Dahu Page – https://dahu-page.vercel.app/
- Optimized contact forms built with React and TailwindCSS.
- High-performance UI with modern web technologies.
- Interactive corporate website featuring a project gallery.

Education

2018 – 2022

Universidad de Ciencias Informáticas
Computer Science Engineering (Ingeniería Informática), Software Engineering

- GPA: 9.6/10 (Academic Excellence Honor – awarded to the top percentile of students).
- Relevant Coursework: Algorithms, Data Structures, and Operating Systems applied in practical software projects.

Competencies

- Teamwork.
- Leadership and mentoring.
- Effective communication.
- Problem-solving.
- Adaptability.
- Time management.

Languages

Spanish: Native.

English: C1 Advanced (MCER).
